Since the claims drawn to a touch fastener, classified in class 428, subclass 99 set forth in the restriction made on 12/01/2005 further need to have an election of species made, species (i) base with selvedge and (ii) base with a film having a softening point, a supplemental restriction which takes into account the species restriction is deemed necessary.

Supplemental Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-30, 67-79, and 94-101, drawn to a touch fastener, classified in class 428, subclass 99.
- II. Claims 31-52, 80-93 and 102-118, drawn to a method of forming a seat foam bun, classified in class 264, subclass 46.4.
- III. Claims 53-66, drawn to a seat foam bun, classified in class 428, subclass 304.4+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and (II, III) are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process of using that product such as it may adhered to the end of a pole and the pole attached to another article.

Inventions II and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process such as providing a mold cavity comprises a trench having a circular shape instead.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention: Group I, claims 1-30, 67-79, and 94-101 drawn a touch fastener needs to have an election of species made, species (i) base with selvedge and (ii) base with a film having a softening point.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
